All, We have been working on these questions and here's where we are at this point! Caution is definitely required since we will essentially daylight that we will not be following the budget figures in the Congressional rollout brief. The roll out brief reflects our budget profile prior to our current must-fund exercise FY07-(b) (5), FY08-(b) (5), must-fund profile FY07-(b) (5), FY08-(b) (5). Roger, probably needs to scrub these answers again, sorry but it is a dicey business! Rob has been patiently waiting and I think we are on the hook to discuss these next Monday. V/R, Laura

_____ 1. Complete cost to clean-up each of the 6 parcels of land (cost for each parcel).

Cost to complete estimates are tied to specific remediation sites at each base. While we can calculate costs for each parcel we do not release these numbers when an early transfer is considered, as those costs will need to be negotiated. The most recent Annual Report to Congress reflects the (b) (5) cost to complete the HP program.

The recent 49ers proposal is anticipated to add approximately (b) (5) to the total cost to complete.

2. True need for clean-up in FY-08? What was the Navy's sustained plan to clean Hunter's Point? Why is it (b) (5) in FY-08? (Concern that OMB or OSD are not allowing the Navy to move faster) Since 2003, the Navy has spent more than (b) (5) in cleanup at Hunters Point as we sought to accelerate cleanup using available land sale revenue. As we have nearly depleted the land sale revenue, we have scaled back to a more customary level of funding at HP. Given current budgetary constraints, the Navy will support the legal requirements of (b) (5) and strive to continue to accelerate.

3. How much has the Navy received in LSR?

The Navy has received (b) (5) in prior BRAC LSR and has been using to finance, in part or in whole, the BRAC program each fiscal year since FY03.

4. How much has the Navy obligated in LSR?

The remaining Navy LSR of (b) (5) is budgeted for FY07-FY09. (Steered clear of obligation number because the data was weird.)

5. Does any of the (b) (5) received by DoD in the HJRes 20 go towards Hunter's Point?

Allocation of the additional (b) (5) in pending OSD decision, and will be included in the spend plan report due to Congress by 15 March.

6. What is the Navy's baseline budget for Hunter's Point?

The Navy has spent close to (b) (5) at Hunters Point. With (b) (5) planned in FY07 and a FY08+ cost to complete of (b) (5) due to the recent recognition of low level radioactive waste, and overall affordability, the Navy is considering alternative approaches to reduce costs and speed up cleanup and disposal. Accordingly, a baseline budget for HP is not available.

Tough questions. Here's my stab. High stakes poker here, so we need to make sure leadership is on board.

All, Here's an initial start on the answers to these questions. In some cases, we didn't answer what they asked. The obligation data that Renee provided didn't seem to reflect all the LSR to date, so pls look how we tried to address it and give me your thoughts. I don't know if all the LSR we have kept track of can be found in any official database. Roger, hoping to hear a lot from you here to keep us safe and sound! Laura

Laura:

This is all Michael pushing through Pelosi. Because he can't get a commitment from the 49ers, his new focus is that Early Transfer is good for the Navy and City even if the 49ers don't come because it gets the property out of Navy ownership and into development. He's trying to show that his schedule is not much of an additional cost to the Navy. What gets lost is the planned schedule is much longer than he shows.

A start on the answers is attached. Maybe we should delete all the 49ers reference since she didn't specifically ask for that.

Laura,

Could use your assistance in gathering the information requested by Rep. Pelosi's office.

Asked for the following 6 questions:

1. Complete cost to clean-up each of the 6 parcels of land (cost for each parcel).
2. True need for clean-up in FY-08? What was the Navy's sustained plan to clean Hunter's Point? Why is it (b) (5) in FY-08? (Concern that OMB or OSD are not allowing the Navy to move faster)
3. How much has the Navy received in LSR?
4. How much has the Navy obligated in LSR?
5. Does any of the (b) (5) received by DoD in the HJRes 20 go towards Hunter's Point?
6. What is the Navy's baseline budget for Hunter's Point?

Can we turn this request around quickly? Can you send me a copy of the brief, I don't have the electrons?

Appreciate your help.

v/r,
Rob

NO. 550 P. 2

COMMITTEE ON APPROPRIATIONS
COMMITTEE ON THE JUDICIARY
COMMITTEE ON RULES AND
ADMINISTRATION - CHAIRMAN
SELECT COMMITTEE ON INTELLIGENCE

January 10, 2007

The Honorable Donald C. Winter
Secretary of the Navy
1000 Navy Pentagon
Washington, DC 20350-1000

Dear Secretary Winter,

San Francisco recently proposed a new 49ers stadium at Hunters Point and I believe the offer has excellent potential. To meet the team's scheduled plan for opening the stadium by 2012, I would like to discuss with you the steps necessary to expedite and complete environmental remediation of the site.

It would also be useful to learn more from you about the timeframe for conveying the property and issues that state and federal regulators may raise as the City tries to move forward with the 49ers. I am interested in assisting the Navy on this project in any way possible and believe we can meet the interests of all the parties involved.

I would very much like to speak with you this week and will contact your office shortly.

Sincerely,

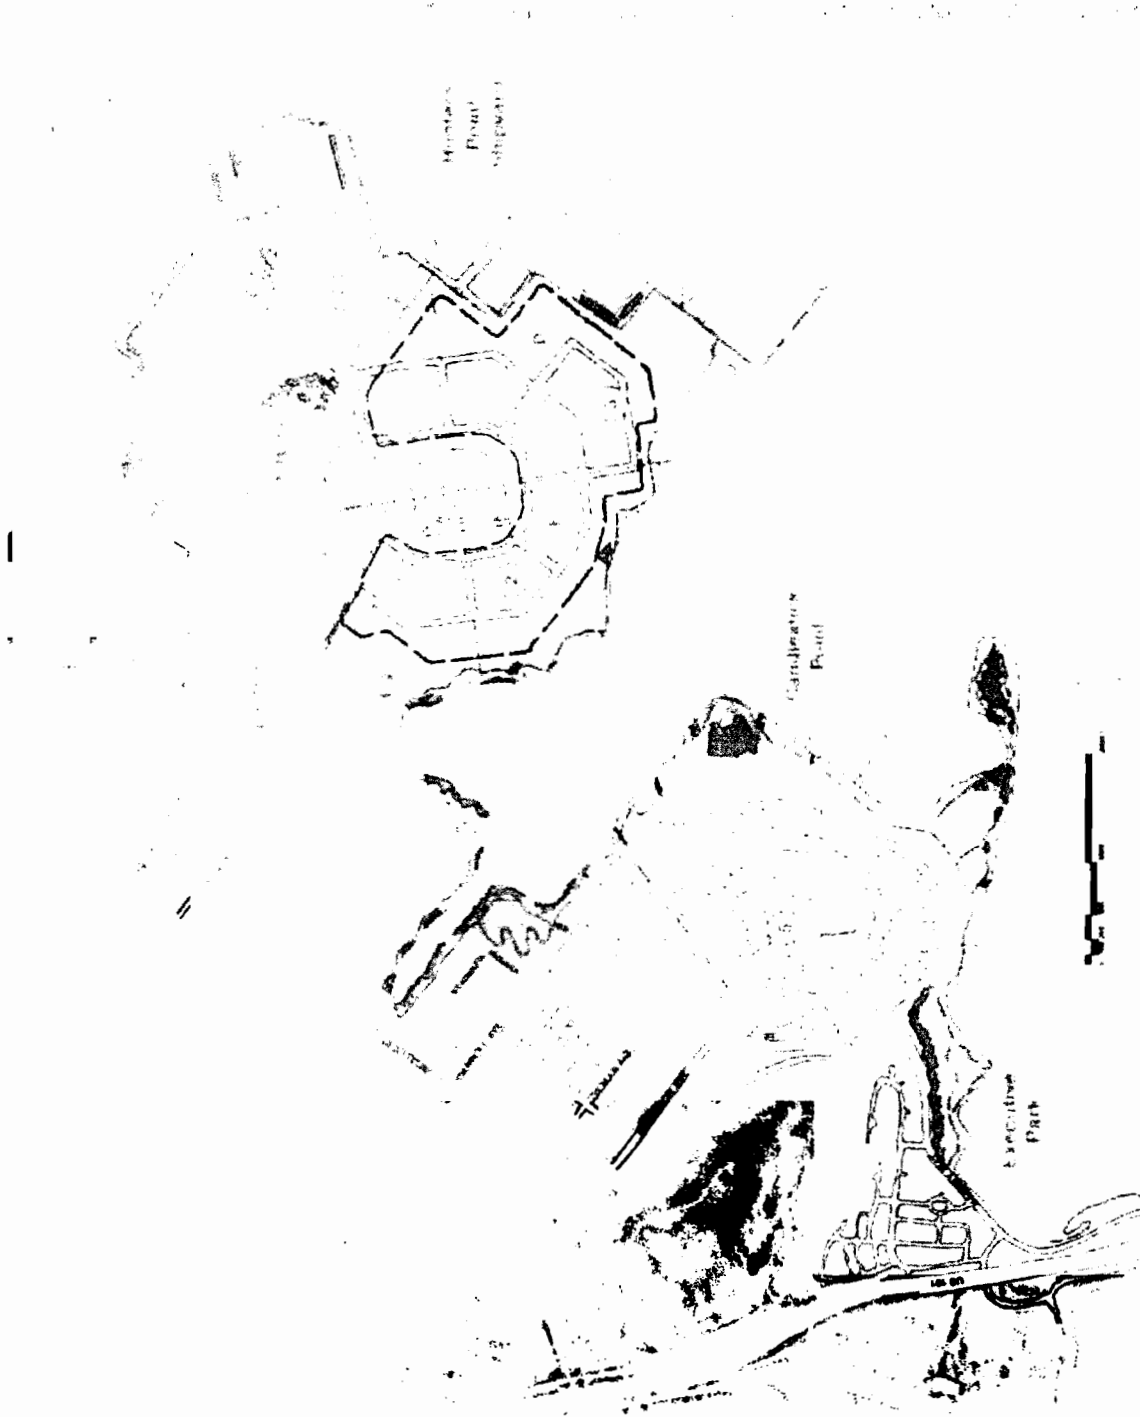

A handwritten signature in black ink, appearing to read "Dianne Feinstein", with a long horizontal flourish extending to the right.

Dianne Feinstein
